

November 15, 2000

MEMORANDUM TO: File

FROM: Jack N. Donohew, Senior Project Manager, Section 2  
Project Directorate IV and Decommissioning  
Division of Licensing Project Management /RA/  
Office of Nuclear Reactor Regulation

SUBJECT: TAC NUMBER FOR MEETINGS OR CONFERENCE CALLS  
WITH THE LICENSEE FOR WOLF CREEK GENERATING  
STATION ON TECHNICAL MATTERS AT THE REQUEST OF  
THE LICENSEE (TAC NO. MB0265)

On Tuesday, October 17, 2000, the staff held a conference call with the licensee on the licensee's proposed use of ASME Code Case N-513 (10 CFR 50.55a(b)(2)(xiii), "Flaws in Class 3 Piping,") to justify not repairing 9 welds in a section of the low energy component cooling water (CCW) piping on the discharge of the reactor coolant system letdown heat exchanger. The licensee, in an e-mail dated October 17, 2000, submitted the enclosed 3 drawings of the affected CCW piping.

The licensee agreed to have TAC MB0265 taken out by the staff to account for the staff's time spent in the conference call of October 17, 2000, and any further calls or meetings that might result from the discussions between the staff and the licensee on the CCW piping.

The licensee also requested that the TAC be kept open to be used by the staff during the coming year for the staff to charge its time for other conference calls and meetings on other technical issues requested by the licensee.

Docket No. 50-482

Attachments: Three P&ID Drawings
