**INTENT TO UTILIZE CORPORATE  
TELECOMMUNICATIONS NETWORK FOR LONG DISTANCE  
ACCESS TO NRC EMERGENCY TELECOMMUNICATIONS SYSTEM CIRCUITS**

Ladies and Gentlemen:

NRC Regulatory Issue Summary (RIS) 2000-11, "NRC Emergency Telecommunications System," dated June 30, 2000, described impending changes to the currently installed NRC Emergency Telecommunications System (ETS). This RIS also notified addressees about a voluntary, optional approach that would utilize corporate telecommunications systems in lieu of the NRC's dedicated circuits for providing ETS service. Details of this optional approach are described within Attachment 2 to the RIS.

The purpose of this letter is to provide follow-up to prior verbal notifications to the NRC regarding the intent of Carolina Power & Light (CP&L) Company to utilize the voluntary, optional approach described within Attachment 2 to the RIS. CP&L's corporate telecommunications network will be utilized to route ETS calls to long distance service independent of local telephone switches for the above-listed facilities. This conversion is scheduled to be completed in the fourth quarter of 2000. The point of contact for CP&L's implementation is Mr. S. N. Little, who can be reached at (843) 857 - 1321.
