Dear Mr. Meyer,

As concerned students of St. Mary's College of Maryland, we are writing to you in regards to the notification that there is a possibility that "low level" radioactive soil from nuclear power plants may be sold to homeowners, brick makers, and paving manufacturers. We are concerned about this because it is understood that this will be done under the authority of solely a literature search, with no real research having previously been done. We as college students are worried about our futures after graduating, and do not feel that we need the added pressure of concern for the dirt our children will one day be playing in. We believe that your commission will make the right decision. Thank you for your time.

Sincerely,

Katharine Alanna Fritz
