David L. Meyer, Chief
Rules and Directives Branch
Office of Administration Mail Stop T-6D59
US Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. David Meyer,

It is horrifying to discover that the Nuclear Regulatory Commission is even considering releasing radioactively contaminated soil for reuse. What are people on that commission thinking? Is money a God that it is the only thing considered? You, more than anyone, should know that there are no safe doses of radiation.

We want ABSOLUTELY NO radioactively contaminated soil release for reuse of any kind! We ask that you keep this material ISOLATED from the environment and from the public.

Thank you for giving this serious consideration.

Sincerely,

Madeline A. Studer
Adeline M. Hagen
