Comments: The whole idea of marketing, let alone giving away for free, "low level" contaminated soils to golf courses and especially to farmers is a horrible one that should be dropped immediately! This soil should NEVER be given, let alone sold to anyone that will use it anywhere near where people will be walking around, let alone on it and should never, never, NEVER be used to as a "substrate" to grow food for either human or beast!

Please drop this idea immediately!
