Mr. M. Reddemann
Site Vice President
Kewaunee and Point Beach Nuclear Plants
Nuclear Management Company, LLC
6610 Nuclear Road
Two Rivers, WI 54241

SUBJECT: MID-CYCLE PERFORMANCE REVIEW AND INSPECTION PLAN - POINT
BEACH NUCLEAR PLANT

Dear Mr. Reddemann:

On November 8, 2000, the NRC staff completed its Mid-Cycle plant performance assessment of Point Beach. The Mid-Cycle Review for Point Beach involved the participation of all technical divisions in evaluating performance indicators (PIs) and inspection results for the period of April 2, 2000, through September 30, 2000. The purpose of this letter is to inform you of our assessment of your safety performance during this period and our plans for future inspections at your facility so that you will have an opportunity to prepare for these inspections and to inform us of any planned inspections which may conflict with your plant activities.

Plant performance for the most recent quarter was within the Licensee Response Column of the NRC's Action Matrix, based on all inspection findings being classified as having very low safety significance (Green) and all PIs indicating performance at a level requiring no additional NRC oversight (Green). During the previous quarter (second quarter 2000), the Alert and Notification System PI indicated performance at a level that may result in increased NRC oversight (White). A supplemental inspection was conducted during the second quarter to review the circumstances of this White PI. Based on the results of this inspection and the fact that the Alert and Notification System PI indicates Green for the third quarter, we plan to conduct only baseline inspections at your facility through September 30, 2001.

The enclosure details the scheduled inspections that will occur through September 30, 2001. The inspection plan is provided to minimize the resource impact on your staff and to allow for scheduling conflicts and personnel availability to be resolved in advance of inspector arrival onsite. Routine resident inspections are not listed due to their ongoing and continuous nature. The last 6 months of the inspection plan are tentative and will be revised at the end-of-cycle review meeting.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

If circumstances arise which cause us to change this inspection plan, we will contact you to discuss the change as soon as possible. Please contact me at (630) 829-9631 with any questions you may have regarding this letter or the inspection plan.

Sincerely,

/RA/

Roger D. Lanksbury, Chief
Reactor Projects Branch 5
