Lusby, MD 20657

SUBJECT: CORRECTION REGARDING IMPLEMENTATION OF AMENDMENT NO. 178, CALVERT CLIFFS NUCLEAR POWER PLANT, UNIT NO. 2 (TAC NO. M89588)

Dear Mr. Denton:

By letter dated November 1, 1994, the Commission issued Amendment No. 178 to Facility Operating License No. DPR-69 for the Calvert Cliffs Power Plant, Unit No. 2.

Amendment No. 178 to Facility Operating License No. DPR-69 indicated that the license amendment is effective as of the day of its issuance and is to be implemented within 30 days. The 30-day time period is the normal time period for implementing amendments to allow for the necessary administrative actions required by licensees for processing approved amendments. However, as noted in your request for this amendment, these Technical Specifications (TSs) require hardware modifications and the TSs cannot be implemented until the restart from the upcoming refueling outage which is to commence in March 1995. Therefore, it is necessary to change the implementation to be prior to restart from the upcoming refueling outage (RFO-10) for Unit No. 2.

Enclosed is corrected Page 2 of the license amendment reflecting to above corrected implementation schedule for the license amendment. We apologize for any inconvenience this may have caused.

Sincerely,

Original signed by
