

September 11, 2000

MEMORANDUM TO: Frank J. Congel, Director  
Incident Response Operations

FROM: Joseph G. Giitter, Chief (/RA by Joseph G. Giitter)  
Operations Section  
Incident Response Operations

SUBJECT: SUMMARY OF SEPTEMBER 6, 2000  
DROP IN MEETING WITH EPRI

On September 6, 2000, I attended a drop-in meeting with John Allen of EPRI. Accompanying John was Jim Fortune, who is heading up EPRI's effort to support the electric utility industry in addressing critical infrastructure protection issues. They were in town to meet with NERC that afternoon. John provided us with copies of a slide presentation that they are using as part of their outreach effort with DOE, NERC and other organizations. One of EPRI's primary focus areas is addressing the potential security risk to systems responsible for the distribution and transmission of electrical power (e.g., EMS, SCADA) – essentially the same systems that were focused on as part of the electric industry Y2K effort. I told EPRI that we were in the very early stages of our effort to support DOE in their role as the lead for the energy sector, but agreed that we needed to coordinate our efforts in the future. A list of the meeting attendees and a copy of the EPRI handout is attached.
