Betty Golden.... thank you for your response to my previous message.... BUT,
No information needs to be gathered. No wasting of tax payers money.
The BOTTOM LINE is... IT SHOULD NOT EVEN BE GIVEN A CHANCE
FOR CONSIDERATION... for any kind of 'potential radioactive soil reuse'!!!
The powers to be..... have done enuf to help contaminate our planet!!!!

This is to acknowledge receipt of your comment filed in response to the Federal Register notice published July 19, 2000 (65 FR 44843). The notice requested comments on draft NUREG-1725, "Human Interaction with Reused Soil: A Literature Search." The NRC is currently only gathering information regarding potential soil reuse. This report is just one of the many pieces of information that will need to be collected and evaluated before any decision can be reached. In all cases, it is our mission and responsibility to ensure the adequate protection of the public and the environment from radioactive materials regulated by the NRC.
