Dear Betty Golden, thank you for your acknowledgement of the receipt of my last comment. Can you please add this: The American people have to wonder how much money the nuclear power industry must be paying the NRC to NOT DO THEIR JOB of protecting our health and safety by pursuing this outrageous unjust proposal that seeks to poison, contaminate and harm us in many many ways. It is irresponsible, reprehensible, and unethical for the NRC to do this research and seriously consider this proposal (which included gathering information from 56 documents out of 2 million!) thereby becoming a puppet/henchmen for the nuclear power industry.

> This is to acknowledge receipt of your comment filed in response to the Federal Register notice published July 19, 2000 (65 FR 44843). The notice requested comments on draft NUREG-1725, "Human Interaction with Reused Soil: A Literature Search." The NRC is currently only gathering information regarding potential soil reuse. This report is just one of the many pieces of information that will need to be collected and evaluated before any decision can be reached. In all cases, it is our mission and responsibility to ensure the adequate protection of the public and the environment from radioactive materials regulated by the NRC.
