Subject: Radioactive waste disposal

65FR44843

7-19-00

(87)

People are having more than enough trouble from toxins in the environment: environmental illnesses, Parkinsons Disease, cancer, congenital diseases in the children, asthma, etc. Please put me on record as asking that those in charge of distributing or hiding "low-level" radioactive waste get a grip. The radioactive materials should be isolated to the best of our ability, not dispersed. Susan Molloy
