

REGULATORY DOCKET FILE COPY

SEPTEMBER 14 1979

Dockets Nos.: 50-317
and 50-318 ✓

Mr. A. E. Lundvall, Jr.
Vice President - Supply
Baltimore Gas & Electric Company
P. O. Box 1475
Baltimore, Maryland 21203

Dear Mr. Lundvall:

The Commission has issued the enclosed Amendments Nos. 41 and 23 to Facility Operating Licenses Nos. DPR-53 and DPR-69 for the Calvert Cliffs Nuclear Power Plant, Units Nos. 1 and 2. The amendments add license conditions relating to the completion of facility modifications for fire protection in response to your letters dated March 15, 1977, July 11 and October 20, 1978, March 22, April 19, August 6, 17 and 29, 1979.

We have discussed the contents and conditions of these license amendments with members of your staff and we understand that you have agreed to these license amendments. Nevertheless, you understand that by the provisions of 10 CFR Part 2 paragraph 2.204, you may demand a hearing with respect to all or any part of the amendments within 20 days from the date of publication of the notice in the Federal Register of the issuance of these amendments. If you do not demand a hearing, these amendments will become effective on the expiration of that 20 day period.

By Amendments Nos. 26 and 11, dated December 2, 1977, we issued Technical Specifications to incorporate limiting conditions for operation and surveillance requirements for existing fire protection systems. We request that you propose revised Technical Specifications related to facility modifications required by the enclosed amendments by August 1, 1980.

We have determined that no license amendment fee is required to accompany your response to the aforementioned request. This determination is limited to those applications or requests to incorporate our recommended Technical Specifications and those to add surveillance and other requirements for operable systems that have been added at our request. Any other unrelated changes or requests that you might choose to include in the fire protection requests would be subject to amendment fees in accordance with Section 170.22 of 10 CFR Part 170.

(see 50-317 for encl.)

OFFICE ➤

SURNAME ➤

DATE ➤

In the enclosed Safety Evaluation Report (SER) for the Calvert Cliffs Nuclear Power Plant, Alternate Safe Shutdown Capability was identified as an incomplete item of review in Section 3.2.1. To expedite the completion of our review of this item, we are enclosing our position entitled, "Safe Shutdown Capability." Section 8 of this document specifies the information we require to complete our review. Please provide this information with your response to the item identified in SER Section 3.2.1 which is to be submitted in November 1979. If some of the information is already available in a previous submittal, you need only reference that material.

A copy of the Notice of Issuance is also enclosed.

Sincerely,

Robert W. Reid, Chief
Operating Reactors Branch #4
Division of Operating Reactors
