BALTIMORE GAS AND ELECTRIC COMPANY

(Calvert Cliffs Nuclear Power Plant, Unit No. 1)

DOCKET NO. 50-317

PROVISIONAL CONSTRUCTION PERMIT

Construction Permit No. CPPR-63

1. Pursuant to § 104 b. of the Atomic Energy Act of 1954, as amended (the Act), and Title 10, Chapter 1, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities", and pursuant to the order of the Atomic Safety and Licensing Board, the Atomic Energy Commission (the Commission) hereby issues a provisional construction permit to the Baltimore Gas and Electric Company (the applicant) for a utilization facility (the facility), designed to operate at 2440 megawatts (thermal), described in the application and amendments thereto (the application) filed in this matter by the applicant and as more fully described in the evidence received at the public hearing upon that application. The facility, known as the Calvert Cliffs Nuclear Power Plant, Unit No. 1, will be located at the applicant's site along the western shore of the Chesapeake Bay in Calvert County, Maryland, about ten and one-half miles southeast of Prince Frederick, Maryland.

2. This permit shall be deemed to contain and be subject to the conditions specified in §§ 50.54 and 50.55 of said regulations; is subject to all applicable provisions of the Act, and rules, regulations and orders of the Commission now or hereafter in effect; and is subject to the conditions specified or incorporated below:

- A. The earliest date for the completion of the facility is April 1, 1972, and the latest date for completion of the facility is April 1, 1973.
- B. The facility shall be constructed and located at the site as described in the application in Calvert County, Maryland.
- C. This construction permit authorizes the applicant to construct the facility described in the application and the hearing record in accordance with the principal architectural and engineering criteria set forth therein.

3. This permit is provisional to the extent that a license authorizing operation of the facility will not be issued by the Commission unless (a) the applicant submits to the Commission, by amendment to the application, the complete final safety analysis report, portions of which may be submitted and evaluated from time to time; (b) the Commission finds that the final design provides reasonable assurance that the health and safety of the public will not be endangered by the operation of the facility in accordance with procedures approved by it

in connection with the issuance of said license; and (c) the applicant submits proof of financial protection and the execution of an indemnity agreement as required by § 170 of the Act.
