SUBJECT: DUKE ENERGY CORPORATION RE: EXTENSION OF DUE DATE FOR
MATERIAL BALANCE REPORT - OCONEE NUCLEAR STATION, UNITS 1, 2,
AND 3

Dear Mr. Culp:

Title 10 of the *Code of Federal Regulations* (10 CFR) Section 70.53(a)(1) requires that each licensee who is authorized to possess certain specified quantities of special nuclear material submit material balance reports as required by 10 CFR 74.13(a)(1). 10 CFR 74.13(a)(1) requires that each licensee compile a report as of March 31 and September 30 of each year and file it within 30 days after the end of the period covered by the report. In addition, this section states that the Commission may permit a licensee to submit the reports at other times when good cause is shown.

By letter dated November 9, 2000, you requested an extension of the due date for the Material Balance Reports for the reporting period ending September 30, 2000, for the Oconee Nuclear Station, Units 1, 2, and 3. The request would extend the due date to November 30, 2000. The reason given for the request was that a new special nuclear materials database has been installed and extra time has been needed for verification and validation of the results.

The staff has reviewed your request and concluded that good cause has been shown for delaying the submittal of the reports for Oconee. Therefore, the staff finds that delaying the submittal that was due by October 30, 2000, until November 30, 2000, is acceptable. The staff is concerned, however, that your request was not submitted in a timely manner; i.e., well after the end of the report period and the filing date.

Sincerely,

/RA/

David E. LaBarge, Senior Project Manager, Section 1
Project Directorate II
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket Nos. 50-269, 50-270, and 50-287
