CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.

DOCKET NO. 50-247

ORDER EXTENDING FACILITY OPERATING LICENSE EXPIRATION DATE

Consolidated Edison Company of New York, Inc., is the holder of Facility Operating License No. DPR-26 issued by the Commission on October 19, 1971, which authorizes fuel loading and subcritical testing of the Indian Point Nuclear Generating Unit No. 2, a 2758 megawatt (thermal) pressurized water nuclear reactor, located on the Company's site in the Village of Buchanan, Westchester County, New York.

On January 30, 1973, the Company requested an extension of the expiration date because of delays which prevent completion of subcritical testing. Such testing was interrupted by the determination to refabricate the core. The final shipment of fuel is expected on site shortly, but because of the time element involved the fuel may not be loaded into the reactor prior to the expiration of DPR-26. The Director of Regulation having determined that this action involves no significant hazards consideration different from those previously evaluated, and good cause having been shown:

8111030686 730301
PDR ADOCK 05000247
P PDR

IT IS HEREBY ORDERED THAT the latest expiration date of Facility Operating License No. DPR-26 is extended from March 1, 1973, to June 1, 1973.

Dated at Bethesda, Maryland, this 1st day of March, 1973.

FOR THE ATOMIC ENERGY COMMISSION

A Giambusso
A. Giambusso, Deputy Director
for Reactor Projects
Directorate of Licensing
