Subject: Dedicated Team

Ron Parkhill mentioned to me that Fritz was inquiring regarding his potential availability to support a planned inspection of the TMI-2 facility in Idaho.

While Ron has not agreed to go nor is it a done deal, Ron was concerned that preparations, inspection and report writing could stretch into a "one-month" effort. While one could argue about the amount of effort, I wanted to call this possible intrusion into the dedicated NAC team to your attention.

Tim
