Subject: NAC-UMS Maine Yankee Fuel Amendment

FYI -

Kim Gruss and I had a telecon with NAC yesterday afternoon, in which we asked NAC to include hot cell examination data from a DOE report in their submittal (expected on 3/15). This information would support the storage of some of the higher burnup fuel for Maine Yankee. NAC said that they could incorporate this data but it would delay the submittal by a couple of days.

They said they could get us the complete submittal by Monday (3/20). We agreed that they should send us the complete submittal on that date rather than an incomplete package earlier.

Steve
