Subject: Re: Plan for issuing the Draft CoC and SER for UMS-MY

Not sure at the moment. Too many balls in the air. The impact of the NUTUG comments on what we do for the MY amendment. The fact that we are still trying to nail down issues. The team is starting to get focused on the public comments now, taking them away from finishing MY. It was supposed to be done already, but I don't know if I've seen my last submittal or not (I suspect not since we are just starting the review of the new heat loads aspects). Too early to tell.

Tim

In addition to the voice-mail that I left you at about 1:25 PM, can you please provide some input on the following?

Can you give me an idea of which week you see the completion of the UMS-MY Draft CoC and SER? I would like to respond to the NAC Project manager for the benefit of our customers - SWEC and MY.

Thank you for your help!!
