Subject: Correcting UMS SAR with MY Tables 3.3.1 and 3.3.3

David:

Per your note, I understand that both SAR's should have the note in the table. Since it has already been incorporated in the MY SAR, we know that this will become part of the overall SAR in the future.

Since you were able to respond to the public comment based on the description in Section 3.4.4.1.11, the SAR contains the minimum amount of information, just not in all the places we would like it to be, at this point in time. But, it will be, and so I conclude that this is well enough for now.

I do not plan to ask NAC to make another submittal for the UMS proper, based on this, at this time.

Tim
