Gray File

Dear Mr. O'Toole:

SUBJECT: AMENDMENT NO. 109

By letter dated April 10, 1985 you requested a change to the Technical Specifications for Indian Point Nuclear Generating Unit No. 2. Your request was granted through Amendment No. 109 issued on January 29, 1986. By letter dated March 7, 1986 you indicated that your April 10 application contained a typographical error. This error resulted in an incorrect equation in the Technical Specifications. Because the amendment application was noticed in the Federal Register and reviewed and approved by the NRC staff with the incorrect equation, a correction page can not be issued as you requested. You must submit a new amendment application in order that the change can be properly noticed and reviewed. Therefore you are requested to submit a new amendment application in order that the error can be corrected.

Please provide us with your schedule for submittal of the new application within 30 days.

Sincerely,

Marylee M. Slosson, Project Manager  
PWR Project Directorate #3  
Division of PWR Licensing-A
