*Correction to
 Amdt. 89 to
 DPR-26*

April 9, 1984

Docket No. 50-247

Mr. John D. O'Toole, Vice President
 Nuclear Engineering and Quality Assurance
 Consolidated Edison Company of New York, Inc.
 4 Irving Place
 New York, New York 10003

Dear Mr. O'Toole:

By letter dated March 14, 1984 we transmitted to you Amendment No. 89 to Facility Operating License No. DPR-26, for Indian Point Unit 2, which included Revised Technical Specifications. Through an oversight in processing your amendment request, Amendment No. 89 is incomplete. In consonance with the Safety Evaluation that accompanied Amendment No. 89 the flowrate specified for the Fuel Storage Building Air Filtration System should have been changed in all locations of subparagraph F to Surveillance Requirement 4.5. Therefore, F.6 should also specify 20,000 cfm \pm 10%. Likewise the addition of the flowrate for the Post Accident Containment Venting System (4.5.G) should have been made in all locations in subparagraph G. Therefore, G.3.a should also read 200 cfm \pm 10%. Enclosed are revised Technical Specification pages 4.5-8 and 4.5-9 for your use.

Sincerely,

Roger L. Pedersen

Roger L. Pedersen, Project Manager
 Operating Reactors Branch No. 1
 Division of Licensing
