SUBJECT: ISSUANCE OF AMENDMENT FOR INDIAN POINT NUCLEAR GENERATING UNIT
 NO. 2 (TAC NO. M90896)

Dear Mr. Kinkel:

The Commission has issued the enclosed Amendment No. 198 to Facility Operating License No. DPR-26 for Indian Point Nuclear Generating Unit No. 2. The amendment consists of changes to Technical Specifications (TSs) in response to your application transmitted by letter dated November 2, 1994, as supplemented January 4, 1995, February 19, 1998, April 28, 1998, and June 5, 1998.

The amendment revises the TSs to delete portions of the TSs that have become unnecessary due to previously approved amendments, make editorial changes, change managerial titles, update references and reporting requirements, revise the Station Nuclear Safety Committee (SNSC) composition to specify disciplines rather than specific job titles, modify the recordkeeping requirements of the SNSC, implement changes referenced in Generic Letter 93-07, "Modification of the Technical Specification Administrative Control Requirements for Emergency and Security Plans," relocate audit requirements to licensee-controlled documents and to correct the shift manning requirements table.

A copy of the related Safety Evaluation is enclosed. A Notice of Issuance will be included in the Commission's next regular biweekly Federal Register notice.

Sincerely,

Original Signed by:

Jefferey F. Harold, Project Manager
 Project Directorate I-1
 Division of Reactor Projects - I/II
 Office of Nuclear Reactor Regulation
