

January 31, 2001

Mr. John M. Driskill
Paducah Gaseous Diffusion Plant
President 111
United Plant Guard Workers of America
767 Dry Bridge Rd
Smithland, KY 42081

Dear Mr. Driskill:

I am responding to the petition for rulemaking dated March 13, 2000, that you submitted to the U.S. Nuclear Regulatory Commission (NRC) on behalf of the United Plant Guard Workers of America. Your petition requested that NRC amend its regulations concerning security at the gaseous diffusion plants and was docketed as PRM-76-1.

The notice of receipt of the petition was published in the Federal Register on May 10, 2000 (65 FR 30018). The comment period closed on July 24, 2000. One comment letter was received.

NRC has considered the petition and your supporting rationale. For the reasons provided in the enclosed Federal Register notice, your petition is denied. In summary, the petition is being denied because we have determined that current NRC regulations and certificate conditions governing the gaseous diffusion plants provide adequate protection for both classified matter and special nuclear material at the gaseous diffusion plants and that the increased burden that would be imposed is not warranted.

Sincerely,

/RA/

William D. Travers
Executive Director
for Operations

Enclosure: Federal Register Notice
Denying Petition
