Subject: Comments Concerning Draft Regulatory Guide 1098, "Safety-Related Concrete Structures for Nuclear Power Plants (Other than Reactor Vessels and Containments)," (65FR55064-65, dated September 12, 2000)

Dear Sir/Madam:

This letter is being submitted in response to the NRC's request for comments concerning Draft Regulatory Guide 1098 (DG-1098), "Safety-Related Concrete Structures for Nuclear Power Plants (Other than Reactor Vessels and Containments)," which was published in the Federal Register (reference 65FR55064-65, dated September 12, 2000). This guide is being revised to propose guidance on methods acceptable to the NRC staff for complying with the NRC's regulations on the design, evaluation, and quality assurance of safety-related nuclear concrete structures, excluding concrete reactor vessels and concrete containments.

PECO Energy Company appreciates the opportunity to comment on DG-1098 and supports the comments submitted on behalf of the nuclear energy industry, by the Nuclear Energy Institute.

If you have any questions, please do not hesitate to contact us.

Very truly yours,

James A. Hutton, Jr.  
Director- Licensing
