

UNITED STATES GOVERNMENT

Memorandum

TO : Region III Files

DATE: November 7, 1966

FROM : Eugene T. Mapp *EdM*
Radiation SpecialistSUBJECT: STATE OF ILLINOIS DEPARTMENT OF PUBLIC HEALTH
INSPECTION AT SINCLAIR RESEARCH, INC., HARVEY, ILLINOIS*JMA [signature]
File*

During a routine AEC inspection on October 28, 1966 of the licensed program at Sinclair Research, Inc., Dr. A. I. Snow, Chairman, Radioisotope Committee, commented that an inspection of their radioisotope program had recently been made by State personnel. I told him that we always notify the State of our scheduled inspections, so that the licensee will not have to take time for separate inspections by the AEC and by the State.

During a further inquiry at J. M. Allan's request, Dr. Snow informed me by telephone on November 7, 1966, that the State of Illinois inspection had been made about two months before my inspection and had covered their radioisotope program predominantly, including the Engine Laboratory and the other aspects that we covered. Dr. Snow said that the State inspection probably also covered their ~~x~~-ray diffraction units, but that it was mainly an inspection of their radioisotope program. 3

Dr. Snow stated that anything we could do to prevent duplicate inspections by the AEC and by State would be appreciated very much.
