U. S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Attn: Mr. William Adam

Gentlemen:

Atlantic Richfield Company currently holds NRC License Number 12-00140-04. Recently the ARCO Petroleum Products Company, a subsidiary, requested a termination for that license (Control Number 79495).

With this letter, ChemLink Petroleum Inc., a subsidiary of Atlantic Richfield, requests that the Nuclear Regulatory Commission put on hold the aforementioned termination request.

ChemLink Petroleum Inc. plans to pursue a test using small amounts of carbon-14 within the guidelines of the existing license. Shortly you will receive a detailed petition concerning the planned conduct of this test.

With the recent reorganization within Atlantic Richfield, our intercompany communications have suffered at times. This is one of those times. We greatly appreciate your help and consideration in this matter.

Very truly yours,

John F. Motier
