

DEC 03 1985

Docket No. 50-387/388

Mr. Harold W. Keiser
Vice President
Nuclear Operations
Pennsylvania Power & Light Company
2 North Ninth Street
Allentown, Pennsylvania 18101

Dear Mr. Keiser:

SUBJECT: AMENDMENT NOS. 52 AND 20 TO FACILITY OPERATING LICENSE NOS.
NPF-14 and NPF-22 SUSQUEHANNA STEAM ELECTRIC STATION, UNITS 1 AND 2

The Nuclear Regulatory Commission has issued the enclosed Amendment Nos. 52 and 20 to Facility Operating License No. NPF-14 and NPF-22 for the Susquehanna Steam Electric Station, Units 1 and 2 respectively. These amendments are in response to your letters dated July 31, 1985 as supplemented on September 13, 1985. These amendments revise the Unit 1 and Unit 2 Technical Specifications to include operational control of the newly installed valves in the spray pond spray array drain lines.

A copy of the related safety evaluation supporting Amendment No. 52 and 20 to Facility Operating License Nos. NPF-14 and NPF-22 is enclosed.

Sincerely,

~~On: 10/10/85~~

Anthony Bournia, Acting Director
of BWR Project Directorate No. 3
Division of BWR Licensing

NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

PENNSYLVANIA POWER & LIGHT COMPANY
ALLEGHENY ELECTRIC COOPERATIVE, INC.
DOCKET NO. 50-387
SUSQUEHANNA STEAM ELECTRIC STATION, UNIT 1
AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 52
License No. NPF-14

1. The Nuclear Regulatory Commission (the Commission or the NRC) having found that:
 - A. The application for an amendment filed by the Pennsylvania Power & Light Company, dated July 31, 1985 as supplemented on September 13, 1985 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the regulations of the Commission;
 - C. There is reasonable assurance: (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations set forth in 10 CFR Chapter I;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment and paragraph 2.C.(2) of Facility Operating License No. NPF-14 is hereby amended to read as follows:

(2) Technical Specifications and Environmental Protection Plan

The Technical Specifications contained in Appendix A, as revised through Amendment No. 52, and the Environmental Protection Plan contained in Appendix B, are hereby incorporated in the license. PP&L shall operate facility in accordance with the Technical Specifications and the Environmental Protection Plan.

3. This amendment is effective upon completion of the modification but no later than December 31, 1985.

SAFETY EVALUATION

AMENDMENTS NOS. 52 AND 20 TO NPF-14 AND NPF-22

SUSQUEHANNA STEAM ELECTRIC STATION, UNITS 1 AND 2

DOCKET NOS. 50-387/388

Introduction

By letter dated July 31, 1985, Pennsylvania Power and Light Company (PP&L), the licensee for Susquehanna Steam Electric Station Units 1 and 2, submitted an amendment request for License No. NPF-14 and 22 concerning the installation of new motor operated valves in each ultimate heat sink (spray pond) spray array drain line for freeze protection. The staff has reviewed the design of the freeze protection system which is necessary to support the proposed change to Technical Specification 3.8.4.2 which adds these new valves to the list of safety-related valves requiring thermal overload protection.

Evaluation

By letters dated July 31 and September 13, 1985, the licensee stated that an automatic start capability has been added to the self-priming pumping system for the spray ponds. This will allow drain down of the spray arrays without operator action to provide freeze protection for the spray piping. Further, a new motor operated valve will be installed in each spray array drain line to isolate the spray arrays from the drain pumps. The function of the drain valves is to close automatically when the spray array isolation valves open on demand. Further, an interlock is also provided that prevents the drain valves from opening unless the spray isolation valves are fully closed. These new motor operator valves are Class 1E and powered from the existing Class 1E motor control centers associated with their respective spray pond, thus satisfying the single failure criterion. The addition of these valves is reflected in Technical Specification Table 3.8.4.2-1 for (MOTOR OPERATED VALVES THERMAL OVERLOAD PROTECTION) for Units 1 and 2. These valves are safety related and the valves have thermal overload protection devices; however, this protection is continuously bypassed except during testing. By design all safety related valves have their thermal overload protection devices continuously bypassed except during testing so that the valves can perform their safety related function beyond that which the thermal overload protection would limit.

Based on our review of the freeze protection system design, we conclude that it satisfies applicable criteria for assuring spray pond operability and is therefore acceptable. We agree with the licensee's proposal to revise Technical Specification 3.8.4.2 to add these valves to the list of safety-related valves requiring thermal overload protection. Therefore, this change is acceptable.

8512120191 851203
PDR ADOCK 05000387
P PDR

Environmental Consideration

These amendments involve a change in the installation or use of a facility component located within the restricted area defined in 10 CFR Part 20. The staff has determined that the amendments involve no significant increase in the amounts, and no significant change in the types, of any effluents that may be released offsite, and that there is no significant increase in the individual or cumulative occupational radiation exposure. The Commission has previously issued a proposed finding that these amendments involve no significant hazards consideration and there has been no public comment on such findings. Accordingly, these amendments meet the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Pursuant to 10 CFR 51.22(b) no environmental impact statement or environmental assessment need be prepared in connection with the issuance of these amendments.

Conclusion

We have concluded, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations and the issuance of these amendments will not be inimical to the common defense and security or to the health and safety of the public.

Dated: DEC 03 1985
