

June 18, 1991

IN RESPONSE, PLEASE  
REFER TO: M910607A

MEMORANDUM FOR: David A. Ward, Chairman  
Advisory Committee on Reactor Safeguards

James M. Taylor  
Executive Director for Operations

FROM: Samuel J. Chilk, Secretary /S/

SUBJECT: STAFF REQUIREMENTS - PERIODIC MEETING WITH  
THE ADVISORY COMMITTEE ON REACTOR SAFEGUARDS  
(ACRS), 1:30 P.M., FRIDAY, JUNE 7, 1991,  
COMMISSIONERS' CONFERENCE ROOM, ONE WHITE  
FLINT NORTH, ROCKVILLE, MARYLAND (OPEN TO  
PUBLIC ATTENDANCE)

The Commission was briefed by the ACRS on the following reports it recently provided to the Commission:

- o Proposed Criteria to Accommodate Severe Accidents in Containment Design
- o Proposed Rule on Selection, Training, and Qualification of Nuclear Power Plant Personnel
- o Final Rulemaking to Implement the Emergency Response Data System

The ACRS was urged to review the proposed schedules for review of evolutionary plants for design certification to ensure that sufficient planning and resources will be available to meet the schedules.

(ACRS) (SECY Suspense: 10/25/91)

The staff should review the ACRS letter on containment design criteria and determine how the ACRS suggestions compare with what industry is proposing for the passive LWR plants through the EPRI Requirements Document. Although the ACRS suggests that the new criteria not apply to the evolutionary plants, the staff should compare what industry is proposing for those plants as well.

(EDO) (SECY Suspense: 9/13/91)
