Dear Mr. Keiser:

SUBJECT: REQUEST FOR EXEMPTION FROM 10 CFR 20.103(c)(2)
(TAC NOS. 73119/73120)

RE: SUSQUEHANNA STEAM ELECTRIC STATION, UNITS 1 AND 2

We have received your January 17, 1989 request for an exemption from the requirement of 10 CFR 20.103(c)(2) related to a 12 month time interval for physical examinations to assure that an individual is physically able to use the respiratory protective equipment in an environment containing airborne radioactive material. Specifically, you have requested an exemption to permit the physical examinations once "every 9 to 15 months; provided that the total time over any three consecutive physical examination periods does not exceed 39 months."

Our review indicates that your request is consistent with the staff's position on implementation of the time interval requirements of 10 CFR 20.103(c)(2), and an exemption from 10 CFR 20.103(c)(2) is not needed. However, if you still wish to pursue your January 17, 1989 request for an exemption, let us know your decision at your earliest convenience so that we can process your request in a timely fashion.

Sincerely,

/s/

Mohan C. Thadani, Project Manager

Dear Mr. Keiser:

SUBJECT: TECHNICAL SPECIFICATION CHANGES SUPPORTING ELIMINATION OF THE STEAM
CONDENSING MODE OF THE RESIDUAL HEAT REMOVAL (RHR) SYSTEM OPERATION
(TAC NO. 72851)

RE: SUSQUEHANNA STEAM ELECTRIC STATION, UNIT 1

The Commission has issued the enclosed Amendment No. 91 to Facility Operating License No. NPF-14 for the Susquehanna Steam Electric Station (SSES), Unit 1. This amendment is in response to your letter dated February 24, 1989.

This amendment revises the SSES Unit 1 Technical Specifications supporting modifications to eliminate the steam condensing mode of the RHR system operation.

A copy of our Safety Evaluation is also enclosed. Notice of Issuance will be included in the Commission's Biweekly Federal Register Notice.

Sincerely,

/s/

Walter R. Butler, Director
Project Directorate I-2
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation

DOCKET NO. 50-387

SUSQUEHANNA STEAM ELECTRIC STATION, UNIT 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 91
License No. NPF-14

1. The Nuclear Regulatory Commission (the Commission or the NRC) having found that:
 - A. The application for the amendment filed by the Pennsylvania Power & Light Company, dated February 24, 1989 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the regulations of the Commission;
 - C. There is reasonable assurance: (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations set forth in 10 CFR Chapter I;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment and paragraph 2.C.(2) of the Facility Operating License No. NPF-14 is hereby amended to read as follows:

(2) Technical Specifications and Environmental Protection Plan

The Technical Specifications contained in Appendix A, as revised through Amendment No. 91 and the Environmental Protection Plan contained in Appendix B, are hereby incorporated in the license. PP&L shall operate the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION

SUPPORTING AMENDMENT NO. 91 TO FACILITY OPERATING LICENSE NO. NPF-14

PENNSYLVANIA POWER & LIGHT COMPANY

ALLEGHENY ELECTRIC COOPERATIVE, INC.

DOCKET NO. 50-387

SUSQUEHANNA STEAM-ELECTRIC STATION, UNIT 1

1.0 INTRODUCTION

By letter dated February 24, 1989, Pennsylvania Power & Light Company requested an amendment to Facility Operating License No. NPF-14 for the Susquehanna Steam Electric Station (SSES), Unit 1. The proposed amendment would revise the Technical Specifications in support of the proposed modification which eliminates the Steam Condensing Mode of the Residual Heat Removal (RHR) System operation. Similar changes were approved for SSES Unit 2 operation in Amendment No. 49, dated May 24, 1988.

2.0 EVALUATION

The licensee states that the steam condensing mode of the RHR system operation is not a safety related function. The steam condensing mode will be eliminated by converting the valves, FO11 A/B, to locked closed manual valves by removing the electrical connections, controls, and position indicating lights. The computer points for the position will be deleted. These changes are acceptable because the steam condensing mode of the RHR is not an essential mode (unlike LPCI, containment cooling, and shutdown cooling modes). Moreover, SSES, Unit 1 does not use the steam condensing mode of operation of RHR for mitigation of transients and accidents. For these reasons, the staff concludes that the licensee's proposal to suspend the steam condensing mode of the RHR operation and the associated changes to the Technical Specifications are acceptable.

3.0 ENVIRONMENTAL CONSIDERATION

This amendment involves a change to a requirement with respect to the installation or use of a facility component located within the restricted area as defined in 10 CFR Part 20. The staff has determined that the amendment involves no significant increase in the amounts, and no significant change in the types, of any effluents that may be released offsite and that there is no significant increase in individual or cumulative occupational radiation exposure. The Commission has previously

issued a proposed finding that this amendment involves no significant hazards consideration and there has been no public comment on such finding. Accordingly, this amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Pursuant to 10 CFR 51.22(b) no environmental impact statement nor environmental assessment need be prepared in connection with the issuance of this amendment.

4.0 CONCLUSION

The Commission made a proposed determination that the amendment involves no significant hazards consideration which was published in the Federal Register (54 FR 15834) on April 19, 1989 and consulted with the State of Pennsylvania. No public comments were received, and the State of Pennsylvania did not have any comments.

The staff has concluded, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations and the issuance of this amendment will not be inimical to the common defense and security nor to the health and safety of the public.
