Catawba Nuclear Station
Docket Numbers 50-413 and 50-414

Republication of Topical Reports DPC-NE-3001-PA,
and DPC-NE-3001-A; *Multidimensional Reactor
Transients and Safety Analysis Physics Parameters
Methodology*

Topical report DPC-NE-3001-P, *Multidimensional Reactor
Transients and Safety Analysis Physics Parameters
Methodology*, was approved by an NRC SER dated November 15,
1991. The approved proprietary (-PA) and non-proprietary
(-A) versions of DPC-NE-3001, dated November 1991, were
then published and submitted to the NRC public document
room by Duke letter dated August 17, 1992. Since the
original publication of the approved versions of DPC-NE-
3001 the need for minor changes has been identified. These
minor changes, which are listed at the back of the report,
consist of error corrections and clarifications. No new
models or methodology revisions are included. Since the
republication of DPC-NE-3001 does not include any new
models or methodology revisions, NRC review and approval is
not required. These republished versions of DPC-NE-3001-PA
and -A will be designated by the December 2000 date.
Accordingly, enclosed are 15 copies of the proprietary
version and 12 copies of the non-proprietary version,
submitted in accordance with the guidance contained in
NUREG-0390.

Please note that there is information enclosed that Duke considers proprietary. In accordance with 10CFR2.790, Duke requests that this information be withheld from public disclosure. An affidavit which attests to the proprietary nature of this information is included in this letter.

If there are any questions or if additional information is needed on this matter, please call J. S. Warren at (704) 382-4986.

Very truly yours,

M. S. Tuckman

AFFIDAVIT

1. I am Executive Vice President of Duke Energy Corporation; and as such have the responsibility for reviewing information sought to be withheld from public disclosure in connection with nuclear power plant licensing; and am authorized on the part of said Corporation (Duke) to apply for this withholding.
2. I am making this affidavit in conformance with the provisions of 10CFR 2.790 of the regulations of the Nuclear Regulatory Commission (NRC) and in conjunction with Duke's application for withholding, which accompanies this affidavit.
3. I have knowledge of the criteria used by Duke in designating information as proprietary or confidential.
4. Pursuant to the provisions of paragraph (b)(4) of 10CFR 2.790, the following is furnished for consideration by the NRC in determining whether the information sought to be withheld from public disclosure should be withheld.
 - (i) The information sought to be withheld from public disclosure is owned by Duke and has been held in confidence by Duke and its consultants.

M. S. Tuckman

(Continued)

- (ii) The information is of a type that would customarily be held in confidence by Duke. The information consists of analysis methodology details, analysis results, supporting data, and aspects of development programs relative to a method of analysis that provides a competitive advantage to Duke.
- (iii) The information was transmitted to the NRC in confidence and under the provisions of 10CFR 2.790, it is to be received in confidence by the NRC.
- (iv) The information sought to be protected is not available in public to the best of our knowledge and belief.
- (v) The proprietary information sought to be withheld in this submittal is that which is marked in the proprietary version of the Duke Topical Report designated DPC-NE-3001-PA, *Multidimensional Reactor Transients and Safety Analysis Physics Parameters Methodology*. The published approved versions of this topical report are being submitted to the NRC as an enclosure to this Duke letter. This information enables Duke to:
 - (a) Simulate the response of the Westinhouse-design NSSS to the rod ejection, steam line break, and dropped rod UFSAR accidents.
 - (b) Support Facility Operating Licenses/Technical Specifications amendment requests for McGuire and Catawba Nuclear Stations.

M. S. Tuckman

(Continued)

- (c) Perform safety evaluations per 10CFR50.59.
- (vi) The proprietary information sought to be withheld from public disclosure has substantial commercial value to Duke.
 - (a) It allows Duke to reduce vendor and consultant expenses associated with supporting the operation and licensing of nuclear power plants.
 - (b) Duke intends to sell the information to nuclear utilities, vendors, and consultants for the purpose of supporting the operation and licensing of nuclear power plants.
 - (c) The subject information could only be duplicated by competitors at similar expense to that incurred by Duke.
- 5. Public disclosure of this information is likely to cause harm to Duke because it would allow competitors in the nuclear industry to benefit from the results of a significant development program without requiring commensurate expense or allowing Duke to recoup a portion of its expenditures or benefit from the sale of the information.
