

January 04, 2001

U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: **Docket Nos. 50-361 and 50-362**
Surveillance Requirement 3.0.3, Missed Surveillances
Proposed Technical Specification Change NPT-10/15-512
San Onofre Nuclear Generating Station, Units 2 and 3

References: Letter dated January 19, 2000, from Dwight E. Nunn (SCE) to
Document Control Desk (NRC), same subject

By the referenced letter, Southern California Edison (SCE) requested amendments to the Facility Operating Licenses for San Onofre Nuclear Generating Station Units 2 and 3 to revise the allowable time to complete a missed surveillance test as specified in Surveillance Requirement (SR) 3.0.3 before declaring the affected Limiting Condition For Operation not met. The request conformed to proposed change TSTF-358 of the industry Technical Specification Task Force.

Because TSTF-358 has been revised by the industry, SCE is hereby withdrawing our January 19, 2000 request for license amendments. SCE intends to resubmit our request at a later date, following NRC approval of the revised TSTF. If the NRC uses its CLIP process in approving this TSTF, SCE would plan to make our resubmittal utilizing that process.

If you have any questions or would like additional information concerning this subject, please feel free to contact me or Mr. J. L. Rainsberry at (949) 368-7420.

Sincerely,

cc: E. W. Merschoff, Regional Administrator, NRC Region IV
J. A. Sloan, NRC Senior Resident Inspector, San Onofre Units 2 and 3
L. Raghavan, NRC Project Manager, San Onofre Units 2 and 3
S. Y. Hsu, Department of Health Services, Radiologic Health Branch
