John:

After the telecon this morning, Don Naujock gave me some additional information/comments. Here they are:

ISI-14 -- you proposed using a length sizing qualification criterion of 0.75 RMS in lieu of Appendix VIII, Supplement 4, Subparagraph 3.2(b), and to use the RMS value of 10 CFR 50.55a(b)(2)(xv)(C)(1) which modifies the depth sizing criterion of Appendix VIII, Supplement 4, Subparagraph 3.2(a), in lieu of Subparagraph 3.2(c).

ISI-17 -- you proposed reducing examination volume to one-half (1/2) inch from each side of the weld in lieu of the one-half (1/2) through-wall thickness from each side of the weld requirement of Figures IWB-2500-7(a) and (b). (i.e., you proposed using the above examination volume in lieu of the examination volume requirements specified in the 1989 Edition, Section XI, Table IWB-2500-1, Examination Category B-D, Item B3.90 for Section V, Article 4 of the 1989 Edition of the Code.

The licensee proposed performing the examinations in accordance with the 1995 Edition with 1996 Addenda, Appendix VIII, Supplement 7, as modified by 10 CFR 50.55a(b)(20(xv)(K).
