

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

May 25, 1990

MEMORANDUM FOR: James M. Taylor
Executive Director for operations

FROM: Samuel J. Chilk, Secretary

SUBJECT: STAFF REQUIREMENTS - BRIEFING ON PROPOSE
RULE ON LICENSE RENEWAL (SECY-90-160), 2:
P.M., WEDNESDAY, MAY 16, 1990, COMMISSIONER
CONFERENCE ROOM, ONE WHITE FLINT NORTH,
ROCKVILLE, MARYLAND (OPEN TO PUBLIC
ATTENDANCE)

The Commission was briefed by the NRC staff on the proposed rule for license renewal.

The staff should ensure that consistent usage and clear definition is provided for terminology including: 1) structures, systems and components; 2) renewal term; and 3) sufficient renewal application.

The staff agreed to provide the Commission with a description of the relationship and differences between the current licensing basis and the plant design basis.

(EDO) (SECY Suspense: 6/7/90)

The commission requested that the staff keep it informed of the status of its program to determine how the SEP lessons learned issues have been factored into the licensing basis of operating plants or into ongoing regulatory programs (USI's, GSI's).

The staff is to inform the Commission of the source and derivation of the 197,000 person hours per plant estimates for the analytical and paperwork burden of the proposed rule.

(EDO) (SECY Suspense: 6/30/90)

The Chairman urged the staff to carefully consider the public comments on the proposed rule and incorporate information from the aging research program into the final rule.
