MEMORANDUM TO: Marsha Gamberoni, Chief, Section 1
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: Helen N. Pastis, Senior Project Manager, Section 1 */RA/*
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: RECORD OF TELEPHONE CONFERENCE WITH AMERGEN ENERGY
COMPANY, LLC TO REQUEST AN ALTERNATE REPAIR FOR THE
OYSTER CREEK NUCLEAR GENERATING STATION (TAC NO.
MB0461)

On November 10, 2000, AmerGen Energy Company, LLC (AmerGen or the licensee) held a conference call with the U.S. Nuclear Regulatory Commission (NRC) staff to discuss the need for an expedited approval of an alternative repair of the control rod drive (CRD) housing interface with the reactor vessel at the Oyster Creek Nuclear Generating Station (Oyster Creek). AmerGen stated that the expedited basis for requesting approval would obviate the need to maintain the reactor in a shutdown condition for an extended period of time. Participants in the conference call are listed in Attachment 1. Attachment 2 contains the information telefaxed to the NRC staff by AmerGen to facilitate discussion during the conference call.

The licensee stated that it will be submitting a formal submittal (which actually did occur with a November 10, 2000 letter), the request would be for one cycle only, and it would evaluate the need for a revision to the Technical Specifications of the Oyster Creek license.

By letter dated November 10, 2000, as supplemented on November 14, 2000, AmerGen requested approval of an alternative repair. The alternative repair affected two leaking CRD housing penetrations at Oyster Creek. On November 16, 2000, the NRC staff authorized the alternative repair method.

Docket No. 50-219
