Dear Mr. Byram:

By letter dated November 11, 1994, you submitted the above referenced change request to revise Technical Specification (TS) Section 3/4.3.8 to extend the main turbine valve surveillance test interval from a weekly basis to no greater than 92 days for all main turbine stop, control, and combined intermediate valves.

NOTICE OF WITHDRAWAL OF APPLICATION FOR  
AMENDMENT TO FACILITY OPERATING LICENSES

The U.S. Nuclear Regulatory Commission (the Commission) has granted a request by Pennsylvania Power and Light Company (the licensee) to withdraw its November 11, 1994 application for proposed amendment to Facility Operating License Nos. NPF-14 and NPF-22, for Susquehanna Steam Electric Station, Units 1 and 2, located in Luzerne County, Pennsylvania.

The proposed amendment would have revised the Technical Specifications (TS) to extend the main turbine valve surveillance test interval from a weekly basis to no greater than 92 days for all main turbine stop, control, and combined intermediate valves.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the FEDERAL REGISTER on December 21, 1994 (59 FR 65821). However, by letter dated August 21, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see (1) the application for amendment dated November 11, 1994, and the licensee's letter dated August 21, 1995, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC,
