

January 12, 2001

MEMORANDUM TO: John W. Craig
Assistant for Operations
Office of Executive Director for Operations

FROM: William F. Kane, Director/RA/
Office for Nuclear Material Safety
and Safeguards

SUBJECT: CONSOLIDATED GUIDANCE ABOUT MATERIALS LICENSES

In 1998, the Office of Nuclear Material Safety and Safeguards (NMSS), Division of Industrial & Medical Nuclear Safety, Rulemaking and Guidance Branch, used a Business Process Redesign technique to redesign its materials licensing process. One of the elements of the new process was an aggressive program to update and consolidate numerous guidance documents into a NUREG series of subject-specific documents over a three-year period. NUREG 1556, Volumes 1-20 were developed and are entitled, "Consolidated Guidance About Materials Licenses." The Attachment contains a list of the volumes developed in the NUREG 1556 series. These NUREGs are for use by NRC and Agreement State regulators and licensees/applicants.

We are pleased to announce that as of December 19, 2000, all 20 NUREGs were completed. Although NUREG 1556, Vol 9, "Program Specific Guidance About Medical Use Licenses," has been completed, it will not be issued until publication of the final Part 35 rulemaking. Part 35 was approved by the Commission in an SRM dated October 23, 2000, and will be published following OMB approval of the information collection requirements. The development of the NUREG 1556 series supports the performance goal of maintaining safety, protection of the environment, and the common defense and security as well as reducing unnecessary regulatory burden.

NMSS requests that this information be forwarded to the Commissioners' Assistants for information.
