Subject: Possession Only License Conditions

Docket NO. 40-8502

Hi Elaine,

Well, this exercise became more involved than I thought. I think it will be best to talk about these over the telephone when you have the time. Here is a quick summary:

Everything stays as is except for the following conditions, or portions of the following conditions:

9.9 - remove the first two paragraphs, leave the third (we have already asked for this amendment, I believe.

10.1

10.5

10.10 - we are submitting some proposed changes to the monitoring program as part of the decommissioning plan. We may want to reference these here

10.15

10.21

10.22

11.2 - we have already asked to amend this condition (14 days apart). We would like to reference tables in the renewal document for restoration monitoring (Table 6.2)

11.3 - we are proposing some changes in the decommissioning plan

12.1 - does this still apply for possession only (I would guess so)

12.6 - same question - is this necessary for possession only.

You were right that not much changes. But, there are some things that will help if the proposed monitoring changes in the decommissioning plan are approved.

Call when you can.

Donna
