Re: St. Lucie Units 1 and 2 Docket Nos. 50-335 and 50-389 Proposed License Amendments Supplement to Removal of Technical Specifications Bases From Technical Specifications Index

By Florida Power & Light Company (FPL) letter L-2000-160 dated July 26, 2000, FPL requested that Appendix A of Facility Operating Licenses DPR-67 and NPF-16 be amended to modify the St. Lucie Units 1 and 2 Technical Specifications (TS), respectively. The purpose of the proposed amendments was to revise the TS Index to delete reference to the TS Bases since, in accordance with 10 CFR 50.36(a), the TS Bases are not a part of the TS required by 10 CFR 50.36. Future changes to the TS Bases will be evaluated per 10 CFR 50.59 and made under administrative controls and reviews and in accordance with the proposed in the original submittal were similar to TS 5.5.14 of NUREG-1432, Revision 1, *Standard Technical Specifications Combustion Engineering Plants*, in that they were modified to accommodate changes to the revised 10 CFR 50.59 rulemaking (i.e., replacing the obsolete term "unreviewed safety question").

During a conference call among FPL, the NRC Project Manager, and the NRC Technical reviewer on December 28, 2000, the NRC requested FPL to revise the proposed TS wording. The NRC requested that the wording be changed to be identical to the NRC approved wording in the Industry/Technical Specification Task Force (TSTF) Standard Technical Specification Change Traveler TSTF-364 dated March 9, 2000.

The TS wording for the programmatic controls in this submittal are identical to the wording of TS 5.5.14 of NUREG-1432, Revision 1 as modified by TSTX-364. Attachment 1 provides the marked-up TS pages with the revised wording of the proposed Technical Specifications for St. Lucie Unit 1. Attachment 2 provides the marked-up TS pages with the revised wording of the proposed Technical Specifications for St. Lucie Unit 1. Attachment 2 provides the marked-up TS pages with the revised wording of the proposed Technical Specifications for St. Lucie Unit 1.

The analysis of the amendment requests provided as Attachment 1 of the original submittal (L-2000-160) bounds the revised TS wording and remains valid. FPL has determined that the proposed license amendments do not involve a significant hazards consideration pursuant to

St. Lucie Units 1 and 2 Docket Nos. 50-335 and 50-389 L-2001-13 Page 2

10 CFR 50.92. The no significant hazard provided as Attachment 2 of the original submittal (L-2000-160) bounds the revised TS wording and remains valid.

In accordance with 10 CFR 50.91(b)(1), a copy of these proposed license amendments is being forwarded to the State Designee for the State of Florida.

The St. Lucie Facility Review Group and the FPL Company Nuclear Review Board have reviewed the proposed license amendments. If approved, FPL requests that the amendments be effective on date of issuance and are to be implemented within 60 days of receipt by FPL.

Should there be any questions about this request, please contact us.

Very truly yours,

Kins, Kundalle

Rajiv S. Kundalkar Vice President St. Lucie Plant

RSK/EJW/GRM

j. Technical Specifications (TS) Bases Control Program

This program provides a means for processing changes to the Bases of these Technical Specifications.

- 1. Changes to the Bases of the TS shall be made under appropriate administrative controls and reviews.
- 2. Licensees may make changes to Bases without prior NRC approval provided the changes do not involve either of the following:
 - a. a change in the TS incorporated in the license; or
 - b. a change to the updated UFSAR or Bases that requires NRC approval pursuant to 10 CFR 50.59
- 3. The Bases Control Program shall contain provisions to ensure that the Bases are maintained consistent with the UFSAR.
- 4. Proposed changes that meet the criteria of Specification 6.8.4.j.2.a or 6.8.4.j.2.b, above, shall be reviewed and approved by the NRC prior to implementation. Changes to the Bases implemented without prior NRC approval shall be provided to the NRC on a frequency consistent with 10 CFR 50.71(e).

j. Technical Specifications (TS) Bases Control Program

This program provides a means for processing changes to the Bases of these Technical Specifications

- 1. Changes to the Bases of the TS shall be made under appropriate administrative controls and reviews.
- 2. Licensees may make changes to Bases without prior NRC approval provided the changes do not involve either of the following:

a. a change in the TS incorporated in the license; or

b. a change to the updated UFSAR or Bases that requires NRC approval pursuant to 10 CFR 50.59

- 3 The Bases Control Program shall contain provisions to ensure that the Bases are maintained consistent with the UFSAR.
- 4. Proposed changes that meet the criteria of Specification 6.8.4.j.2.a or 6.8.4.j.2.b, above, shall be reviewed and approved by the NRC prior to implementation. Changes to the Bases implemented without prior NRC approval shall be provided to the NRC on a frequency consistent with 10 CFR 50.71(e).
