Howard:

SUBJECT: INITIAL EXAMINATION

Please find enclosed the Examination, Quality Assurance Checklist and associated Reference Materials for the Written and Operational Examinations scheduled for November/December 2000.

The following items were identified and corrected following the submittal of our Written and Operational examination outlines:

Callaway SRO Written Examination Outline:

- Question S001: Replaced with 001AA2.05, Uncontrolled Rod Withdrawal Action to reduce emphasis on RIL

Callaway Administrative JPM Outline:

- JPMA.1.1: Replaced with G2.1.33, Perform RCS Inventory Balance to reduce emphasis on RIL.
- JPM A.3: Replaced with question G2.3.4, Calculate Stay Time and with question G2.3.10, Limit Personnel Exposure to increase the level of difficulty.

Callaway Operational JPM Outline:

- JPM Task d: Replaced with 029A3.01, Reinitiate CTMT Purge to satisfy ES-301.D.3a.

Callaway Scenario Outline:

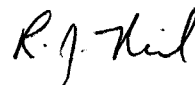

- Both scenarios: Changed event 'A', Reactivity Manipulation to require a specific power change so the task has closure.
- Scenario DS1: Changed event 'C' to Feed Flow Channel Failure so the task is clearly an instrument failure.
