This modification is issued to (1) modify the contract according to the attached Statement of Work, (2) exercise the second option year through 12/31/2001, (3) increase the contract ceiling by \$263,000 from \$798,587 to \$1,061,587, and (4) increase the obligated amount by \$263,000 from \$765,000 to \$1,028,000. Accordingly, the contract is hereby modified as follows:

- (1) Under Section B.3, Consideration and Obligation-Cost Reimbursement (JUN 1988), Alternate I (JUN 1988), paragraphs (a) and (f) are deleted in their entirety and the following paragraphs are substituted in lieu thereof:

"a. The total estimated cost to the Government for full performance under this contract is \$1,061,587."

"f. The amount presently obligated by the Government with respect to this contract and the second option year is \$1,028,000."

- (2) Under Section F.7, Duration of Contract Period (MAR 1987), Alternate I (MAR 1987), the second and third sentences are deleted and substituted with the following sentences in lieu thereof:

"The second option year shall commence on 1/1/2001 and will expire on 12/31/2001. The term of the contract may be extended at the option of the Government for 2 additional option periods."

A summary of obligations for this contract, from date of award through the date of this action, is given below:

Total FY1999 Obligations:	\$ 325,000
Total FY2000 Obligations:	\$ 440,000
Total FY2001 Obligations:	\$ 263,000
 Cumulative Total of NRC Obligations:	 \$1,028,000

This modification obligates \$263,000 in FY2001 funds.

All other terms and conditions remain the same.

## STATEMENT OF WORK

### 1. WORK SCOPE

The Contractor shall perform Test Series 5 as described in the base contract dated February 1, 1999. The actual test conditions to be used will be specified later by the NRC. The main purpose of this test series is to obtain a set of data for assessing code models for entrainment and de-entrainment of liquid. If a test matrix described in Test Series 5 can be made more suitable for the existing test facility, it should be proposed. An adequate amount of instrumentation shall be provided to measure the liquid level at each component; e.g., hot leg, pressurizer and its surge line, and automatic depressurization system (ADS) lines.

### 2. DOCUMENTATION

At the completion of each test or a group of tests, a report shall be prepared and submitted to the NRC. Computer code input decks used in this project and notebooks for developing or modifying input decks as part of this project shall also be provided electronically as well as in paper form.

### 3. TRAVEL

- a. Two 3-day trips by one person from Corvallis, OR to Rockville, MD, and
- b. One trip to Paris, France, on December 11-15, 2000, to participate in negotiations of an expanded PTS test matrix and data exchange with the organizations representing the French government (IPSN and EDF).

### 4. SCHEDULE FOR PERFORMANCE

The test series should be completed by December 31, 2001.

### 5. DELIVERABLES

A test report should be provided for each test or a group of tests. Computer code input decks used in this project and explanations of how their numerical numbers are derived as part of this project shall also be provided electronically as well as in paper form.
