SUBJECT: ACCEPTANCE REVIEW OF THE ENVIRONMENTAL REPORT FOR THE
DUKE COGEMA STONE & WEBSTER MIXED OXIDE FUEL
FABRICATION FACILITY

Dear Mr. Idhe:

The U.S. Nuclear Regulatory Commission (NRC) staff received your Mixed Oxide (MOX) Fuel Fabrication Facility (FFF) Environmental Report (ER) on December 19, 2000. We have performed an acceptance review on the ER to determine if sufficient information is provided to begin staff technical review. Staff has determined that the ER generally addresses the requirements for ERs listed in 10 CFR Part 51, and the items listed in the "Standard Review Plan for the Review of an Application for a Mixed Oxide (MOX) Fuel Fabrication Facility," NUREG-1718, Appendix F, "Environmental Report Content."

The ER is therefore accepted for technical review. Please note that the complete technical review may identify omissions in the submittal information or technical issues that require additional information. The staff will provide any such requests for additional information to you following completion of its technical review. Based on our acceptance review, and projection of current review schedules, we anticipate completing our review by the end of May 2001. If you have any questions related to this letter, or the ER review, please contact Jennifer Davis on (301) 415-5874.

Sincerely,

/RA/

Charlotte E. Abrams, Chief
