Gentlemen:

Subject: Saxton Nuclear Electric Corporation Facility (SNEC)
Facility License No. DPR-4
Docket No. 50-146
Supplement to Technical Specification Change Request No. 61

In accordance with 10 C.F.R. 50.4(b)(1), please find enclosed a request to amend Facility License No. DPR-4.

This submittal replaces Technical Specification change request No. 61 previously submitted by letter E910-00-0075 dated November 30, 2000. Further, it provides the additional information requested by your letter dated January 8, 2001.

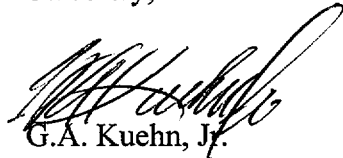

The proposed license amendment reflects an administrative name change from 'GPU Nuclear Corporation' to 'GPU Nuclear, Inc.' This same change has been previously made to other licenses held by GPU Nuclear, but a change to License DPR-4 was omitted. The NRC has previously reviewed the name change and has determined that it does not affect the corporate existence or obligations of the licensee, and involves no significant hazards considerations and no significant environmental impacts. There are no commitments made in this submittal.

This application has been reviewed pursuant to 10 C.F.R. 50.91(a)(1) and an analysis supporting a determination of no significant hazards is included. Pursuant to 10 C.F.R. 50.91(b), copies of this application and supporting analysis, which indicates that no significant hazards consideration is involved, have been provided to the designated representatives of the Commonwealth of Pennsylvania.

A001

GPU Nuclear requests that the amendment be made effective upon issuance. If you have any questions or require additional information regarding this license amendment, please contact Mr. James Byrne at (717) 948-8461.

Sincerely,

G.A. Kuehn, Jr.
Vice President, SNEC and
Program Director, SNEC Facility

Evaluation of Changes

I. LICENSE AMENDMENT REQUEST

GPU Nuclear, Inc. (GPU Nuclear) requests that the License be revised to reflect the administrative change to the Company's name from GPU Nuclear Corporation to GPU Nuclear, Inc.

II. REASONS FOR PROPOSED CHANGES

The company name was changed from GPU Nuclear Corporation to GPU Nuclear, Inc. References to the former name have been replaced with GPU Nuclear, Inc.

III. DESCRIPTION OF CHANGE AND SAFETY EVALUATION JUSTIFYING CHANGES

In the heading of the license, change "GPU Nuclear Corporation" to "GPU Nuclear, Inc."

In paragraph 1.C. of the license, change "GPU Nuclear Corporation" to "GPU Nuclear, Inc."

In paragraph 2.B. of the license, change "GPU Nuclear Corporation (GPU Nuclear)" to "GPU Nuclear, Inc. (hereinafter referred to as GPU Nuclear)"

This is an administrative name change from GPU Nuclear Corporation to GPU Nuclear, Inc. The change does not alter the corporate existence of the company, any of its obligations, responsibilities or liabilities, or the operation, maintenance or decommissioning of the facility.

The NRC has previously reviewed amendments made to other licenses to reflect this administrative name change. As the NRC has previously determined, the name change does not affect the corporate existence of the licensee, and all legal characteristics other than the legal name of the company remain the same. The State of incorporation, registered agent, registered office, directors, officers, rights and liabilities of GPU Nuclear have not and will not change as a result of the amendment. Similarly, the name change does not alter the function of GPU Nuclear or the way it does business. There will be no alteration of any of the existing license conditions, and no change in GPU Nuclear's ability to comply with any licensing conditions or any other obligation or responsibility under the license. There will be no impact on the safe operation of the facility. See 62 Fed. Reg. 66399 (1997) and 63 Fed. Reg. 20223 (1998).

IV. No Significant Hazards Considerations.

The NRC has previously determined that similar amendments reflecting this name change have involved no significant hazards consideration. See 62 Fed. Reg. 4341, 4350 (1997) and 62 Fed. Reg. 59912, 59915 (1997).

Consistent with these prior NRC determinations, GPU Nuclear has determined that the License Amendment involves no significant hazards considerations as defined in 10 C.F.R. 50.92

1. The proposed changes to the Saxton License do not involve a significant increase in the probability of occurrence or consequences of an accident or malfunction of equipment important to safety previously analyzed in the safety analysis report. The changes have no impact on plant operations or the release of radioactive materials.
2. The proposed changes to the Saxton License will not create the possibility for an accident or malfunction of a different type than any previously evaluated in the safety analysis report because no plant configuration or operation changes are involved.
3. The changes will not involve a significant reduction in the margin of safety as defined in the basis of any technical specification for Saxton because no change to operational limits will be made.

V. IMPLEMENTATION

GPU Nuclear requests that the amendment become effective immediately upon issuance.
