Re Docket # 72-22

Dear Sir:

Kindergarten children are taught to clean up their own messes, not to dump them in their neighbor's laps. This lesson, sadly, is forgotten by the time they become adults.

Storage of nuclear waste should be the responsibility of the entity that produced it, and planned for, not just conveniently passed on to their neighbors.

California should leave that waste where it is, or use its own deserts, not ours.

A citizen,
 Fae Picklesimer
