Dr. Edward Shum, Environmental Project Manager
 Spent Fuel Licensing Section
 Spent Fuel Project Office
 Office of Nuclear Material Safety and Safeguards
 U.S. Nuclear Regulatory Commission
 Washington DC, 20555

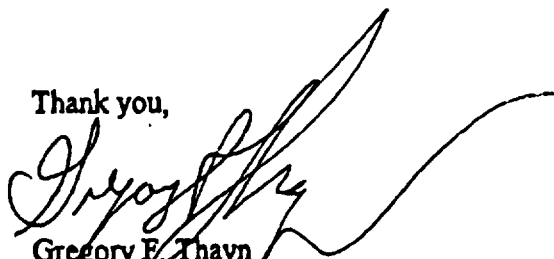

Dear Dr. Shum,

Pursuant to our recent telephone discussions concerning BLMs scoping comments, the BLM has reviewed the draft scoping report for the Environmental Impact Statement (EIS) for the Private Fuel Storage proposed Skull Valley Repository.

We believe that the scoping document adequately identifies BLM's concerns for analysis and alternatives. Because the NEPA process is iterative, there may be a need to address additional issues that may be generated through the analysis process.

We look forward to assisting in the preparation of the EIS and appreciate this opportunity to review the draft report.

Thank you,

Gregory F. Thayne
 NEPA Coordinator
