Jack, I sent you implementation dates earlier for the tech spec amendments. I am not going to be able to give you at this time any better dates for the PNM and EPE dates because they are proceeding cautiously because of the Calif problem. They do not even have speculative dates at this point that they are willing to give me. As I learn more, I will let you know.

For my plants, I sent out a list of the licensing actions completed for the plants with the estimated implementation dates that are in the NRC document control system. The table of licensing actions that are completed, but I do not know the dates implemented for the Palo Verde units is attached. If the completed licensing action has been implemented, list the correct date in the table with a "C" to show completion. If the completed licensing action has not been implemented yet, list the target date for implementation in the table with a "T" to show target date. For the orders issued for the two license transfers, the implementation is when it is expected that the licensees will meet the conditions of the order. Hopefully you can find some target date for those cases.
