Mr. Brian Gutherman  
Licensing Manager  
Holtec International  
555 Lincoln Drive West  
Marlton, NJ 08053

SUBJECT: HI-STORM 100 REVIEW SCHEDULE

Dear Mr. Gutherman:

On August 31, 2000, Holtec International (Holtec) submitted a revised application in accordance with 10 CFR Part 72 for an amendment to Certificate of Compliance No. 72-1014 for the HI-STORM 100 Cask System to permit design changes and allow the use of a 32 assembly fuel basket. Additional information was submitted by Holtec on October 6, and October 10, 2000. On October 30, 2000, the Nuclear Regulatory Commission documented the results of the acceptance review which identified the need for additional information. On November 20, November 22, December 11 and December 22, 2000, Holtec provided the information the NRC requested in the October 30, 2000, acceptance review letter. In accordance with the Spent Fuel Project Office's rules of engagement, we have developed the following schedule for this review:

NRC completes initial technical review and issues request for additional information (RAI) if needed	April 25, 2001
Holtec responds to RAI with complete and accurate submittal	July 25, 2001
NRC completes final technical review and issues preliminary safety evaluation report (SER) and Certificate of Compliance (CoC)	November 6, 2001

Upon completion of the preliminary SER and CoC, we will begin the rulemaking process to modify the list of approved casks described in 10 CFR Part 72, Subpart K. Please reference Docket No. 72-1014 and TAC No. L23082 in future correspondence related to this action. You may contact me at 301-415-2947 if you have any questions regarding our review of the amendment request.

Sincerely,
