

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

January 30, 2001

MEMORANDUM TO: Susan F. Shankman, Deputy Director
Licensing and Inspection Directorate
Spent Fuel Project Office, NMSS

FROM: Timothy Kobetz, Project Manager
Licensing Section
Spent Fuel Project Office, NMSS

SUBJECT: SUMMARY OF THE JANUARY 25, 2001, MEETING BETWEEN THE
NUCLEAR REGULATORY COMMISSION STAFF AND PACIFIC GAS
AND ELECTRIC COMPANY (TAC NO. L23253)

On January 25, 2001, a meeting was held between the Nuclear Regulatory Commission (NRC) staff and representatives of Pacific Gas and Electric Company (PG&E) to discuss PG&E's plans for licensing an independent spent fuel storage installation (ISFSI) at the Diablo Canyon Power Plant. At this meeting, PG&E provided a status update and specific information regarding the proposed ISFSIs. Attachment 1 is an attendance list. Attachment 2 contains the slides used in PG&E's presentation. This meeting was noticed on January 5, 2001.

PG&E plans to apply for a site-specific 10 CFR Part 72 license that will reference use of a high seismic version of the Holtec Hi-Storm dry storage cask. An amendment to approve the use of the Hi-Storm cask that would be used in high seismic areas is currently under review by NRC. At the meeting PG&E presented the following regarding the Diablo Canyon ISFSI:

- PG&E stated that, to accommodate the use of dry cask storage at Diablo Canyon, it must amend the site's 10 CFR Part 50 license to address increased boron concentrations in the spent fuel pool and heavy load lifting issues.
- PG&E presented an overview of the environmental review process used by the California Coastal Commission and compared it to the NRC review process for a site-specific application. This presentation included an overview of the environmental setting surrounding the Diablo Canyon site.
- PG&E introduced a proposed review schedule and identified overlaps and milestones for the reviews of both the site-specific application for Diablo Canyon and the Holtec Hi-Storm high seismic design amendment.

No proprietary information was disseminated or presented at this meeting. No regulatory decisions were requested or made.

Docket Nos. 72-26 (50-275, -323)
