Spent Fuel Project Office

U.S. Nuclear Regulatory Commission

Washington DC 20555

I call this ~~large~~ monopolized group of Federal government and privatized business the BIG NRC (Brainwashing Institute Group of the U.S. Regulatory Commission) but the end, it usually prevails over the safety and well-being and health of the United States citizens; while it sows its seeds of lies and misinformation about the ^{now} needness of nuclear waste, weapons and failing nuclear power plants.

"In a groundbreaking report published last year by the Brookings Institution, America's nuclear expense programs have come at a cost that, if we were taking account welfare ~~for~~ for poor folks, would account for cuts. We have up to 130,000 Hiroshima-sized sermos.

Given that our World War II beast of that Japanese city resulted in 200,000 deaths, we have the capacity to kill the earth's population $4\frac{1}{2}$ times."

"The United States has spent \$5.8 trillion for nuclear weapons since 1940, a figure that is more than the combined federal spending in the last half-century for education, job training, agriculture, environment, social services, general science, and space research, community development, disaster aid, police and energy production."

According to the report, "Atomic Audit: The Costs and Consequences of U.S. Nuclear Weapons since 1940," the evidence is abundant ~~of~~ of buckled nuclear ideas by paranoid politicians."

These "public scoping meetings" are not to inform you (the citizens/public), but to have you comment on the Nuclear Regulatory Commission Environmental Impact Statement

Brainwashing and bullshit (nonsense
esp. foolish insolent talk usu. with ~~the~~
the intention of deceiving or misleading)
go hand-in-hand.

If all this 'radioactive debris' is too
dangerous to leave in states that have made
money off it, why will it not still be
dangerous to all life after it has been
moved to the Skull Valley Band of Goshute
Indian land? Regardless of how much
money the Private Fuel Storage Consortium
pays the Goshutes, the danger to all life,
human, plant, animal, and to the air, water
and land which sustain life, will still
be endangered by the moving of the debris.

Sincerely,
Louise Hess

P.S. The Goshute project is, of course, talking
about the radioactive rods used in Nuclear
Power Plants, but all uses and attempts to
"hide" radioactive debris fit together,
since both are controlled by the NRC. (Established
by Truman in ^{the} 1940s.)

Sincerely,
Louise Hess

UNITED STATES NUCLEAR REGULATORY COMMISSION PUBLIC SCOPING MEETING ^{4/24/99}

The United States Nuclear Regulatory Commission, with the United States Department of the Interior's Bureaus of Indian Affairs, and Land Management Will Hold Two Scoping Meetings April 29, 1999 on Aspects of the Environmental Impact Statement For The Proposed Private Fuel Storage Facility

The purpose of these meetings is to provide an opportunity for the public to comment on the scope of the Nuclear Regulatory Commission's (NRC's) Environmental Impact Statement with regard to: (1) the alternate transportation route proposed by Private Fuel Storage, L.L.C., on Bureau of Land Management (BLM) land along the base of the Cedar Mountains, and (2) the lease agreement between the Private Fuel Storage and the Skull Valley Band of Goshute Indians. BLM and the Bureau of Indian Affairs have agreed to be cooperating agencies with NRC in the development of this EIS.

A Copy of NRC's September 28, 1998, EIS Scoping Report can be viewed at the NRC Local Public Document Room at the University of Utah, Marriott Library, Documents Division, 295 S. 1500 East, Salt Lake City, Utah. A limited number of copies of NRC's scoping report will be available at the meetings.

Written comments may be submitted to Mr. Scott Flanders, Mail Stop O6F18, Spent Fuel Project Office, U.S. Nuclear Regulatory Commission Washington, DC 20555. Comments will be accepted before the meetings and until May 28, 1999.

Times and Locations:

A morning meeting will be held in the Grand Ballroom of the Little America Inn, 500 South Main Street, Salt Lake City, Utah 84101, from 8:00 a.m. to 11:00 a.m.

An evening meeting will be held in the Auditorium of the Tooele High School, 240 West Buffalo Boulevard, Tooele, Utah 840474, from 6:30 p.m. to 9:30 p.m.

The United States Nuclear Regulatory Commission Office of Nuclear Material Safety and Safeguards
