

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

February 8, 1989

MEMORANDUM FOR THE RECORD

FROM: Samuel J. Chilk, Secretary

SUBJECT: STAFF REQUIREMENTS BRIEFING ON ACCIDENT
MANAGEMENT PROGRAM, 2:0 M., MONDAY,
JANUARY 23, 1989, COMMISSIONERS' CONFERENCE
ROOM, ONE WHITE FLINT NORTH, ROCKVILLE,
MARYLAND (OPEN TO PUBLIC ATTENDANCE)

The Commission was briefed by the staff on recommended research programs for FY 89 and FY 90 (described in SECY-89-012 and released at time of briefing), to develop guidance for plant operating staff in the unlikely event that actions are required to respond to accidents beyond the design basis of the plant. These programs are subsets of the integration plan for closure of severe accident issues described in SECY-88-147.

The Commission discussed several important issues described in the staff's proposed plan and indicated that it will provide specific comments in its formal response to SECY-89-012.
