UNITED STATES
NUCLEAR REGULATION COMMISSION
WASHINGTON. D.C. 20555

October 3, 1989

MEMORANDUM: James M. Taylor
Acting Executive Director for Operations

FROM: Samuel J. Chilk, Secretary

SUBJECT: STAFF REQUIREMENTS - BRIEFING ON STUDY OF
ADEQUACY OF REGULATORY OVERSIGHT OF MATERIALS
UNDER A GENERAL LICENSE, 10:00 A.M.,
THURSDAY, SEPTEMBER 21, 1989, COMMITS-
SIONERS' CONFERENCE ROOM, ONE WHITE FLINT
NORTH, ROCKVILLE, MARYLAND (OPEN TO PUBLIC
ATTENDANCE)

The Commission was briefed by the staff on the adequacy of NRC regulatory oversight of materials under a general license.

The Commission requested the staff to provide an analysis of potential health and safety impacts of devices or sources under a general license, identification of those devices and materials for which greater regulatory control is needed, and more focused recommendations to improve the regulation of materials under a general license. In this analysis, staff should also assess whether there is a health and safety basis to specifically license some of these devices to ensure adequate control; to evaluate whether any devices are suitable for exemption from regulatory control; and to provide more focused recommendations on ensuring proper disposition and disposal of generally licensed materials and devices.

(EDO) (SECY Suspense: 3/30/90)

The staff committed to provide the commission the status of activities related to the disposal of greater than Class-C wastes.

(EDO) (SECY Suspense; 12/31/89)
